SUMMARY

I'm a passionate Computer Science undergraduate specializing in AI-driven technologies, with a strong interest in building scalable, impactful digital products. As the Co-Founder of Nutri Cloud, a food-tech startup bridging home chefs and professionals, I've led cross-functional teams, developed real-world solutions from concept to launch. Beyond entrepreneurship, I've gained hands-on experience as a Software Developer Intern at Skill-Dzire, contributing to Android UI optimization and CI/CD automation. I enjoy combining creativity, technical skill, and teamwork to deliver meaningful, user-focused results. My key strengths include product management, full-stack development, and UI/UX design—driven by a mindset of innovation and continuous learning.

TECHNICAL SKILLS

Programming Languages: Python, C, AI

Frontend: React, HTML, CSS

Backend: Springboot, Node.js, MySQL

Mobile: Android Studio, XML

Tools: GitHub, Figma, Docker, Jenkins

PROJECTS

Nutri Cloud - Student Startup

Co-founder

Feb 2024 – Present

Figma, React, Node.js, Firebase

Created a food-tech platform to solve the challenge of unhealthy eating habits among India's urban professionals and students. Built a community-based network of home chefs and cloud kitchens offering organic, home-style meals with reliable delivery. The platform promotes healthy eating, empowers small-scale cooks and women entrepreneurs, and provides affordable access to nutritious food.

Inventory Management System

Full Stack Project

Sep 2023 – Dec 2023

Html, css, React, Java, Springboot, Mysql

Built a full-stack inventory management system, developing the frontend, backend, and database end-to-end. Designed a responsive UI with role-based access control and real-time notifications. Implemented backend services using Python and Java, and structured the MySQL database for efficient data operations—reducing processing delays by 30%. Created an analytics dashboard that enhanced inventory tracking, reporting, and decision-making.

Feedback Management System

DevOps + Full Stack Project

Sep 2025 – Nov 2025

Docker, Kubernetes, Ansible, GitHub Actions, Jenkins

Developed a full-stack Feedback Management System and implemented a complete CI/CD pipeline for automated build, test, and deployment. Containerized the application using Docker, orchestrated deployment with Kubernetes, and automated provisioning with Ansible. Integrated GitHub Actions and Jenkins to create a multi-stage pipeline enabling continuous integration, artifact management, and zero-downtime deployment. Improved deployment speed, reliability, and scalability across environments.

Language Detection

Python + Machine Learning Project

Sep 2025 – Nov 2025

Python, scikit-learn, pandas, NumPy, Flask

Developed a Python-based language detection system capable of identifying the language of text input with high accuracy. Implemented data preprocessing, feature extraction, and model training using scikit-learn, pandas, and NumPy. Built a REST API with Flask for real-time predictions, optimized model performance, and ensured efficient handling of multiple requests.

EXPERIENCE

Software Engineer Intern <i>Yuga Yatra Retail (OPC) Pvt. Ltd.</i>	Dec 2025 – Present <i>Remote</i>
• Developing websites and apps using Cursor AI, Firebase Studio, and AI technologies • Designing creative content and UI using Canva • Working on real-time freelance projects via Upwork • Manageing seller portals on Amazon and Flipkart • Collaborating with team members using Google Workspace for project delivery	

Software Developer Intern <i>Skill-Dzire</i>	May 2025 – June 2025 <i>Remote</i>
• Developed and deployed machine learning models for various industries • Optimized model performance and ensured data quality • Collaborated with cross-functional teams to deliver AI solutions • Created Android UI elements in Java and XML optimized for production, working alongside designers to improve overall usability by 15% • Established automated CI/CD workflows using GitHub and Jenkins, shortening release cycles by 20%, while engaging in Agile stand-ups and sprint planning sessions	

EDUCATION

KI University <i>B-Tech in Computer Science & Engineering</i> AI DRIVEN LANGUAGE TECHNOLOGIES CGPA: 9.24/10	Guntur, India Aug 2023 – May 2027
Bhashyam Junior College <i>Intermediate</i> CGPA: 8.46/10	Guntur, India June 2021 – May 2023

CERTIFICATIONS

- Multicloud Network Associate
- Oracle Cloud Infrastructure Architect
- Linguaskill

LEADERSHIP & ACHIEVEMENTS

- Club Lead, FOCUS (KL University):** Coordinated 5+ technical workshops, guided junior students, and grew club engagement by 40%.
- Smart India Hackathon 2024:** Progressed to Round 2 among thousands of teams with a healthcare solution design and functional prototype.
- Business Plan Competitions:** Reached finalist stage in 3 major university-level contests held across Andhra Pradesh.
- Hackathon Awards:** Received multiple special mentions for building full-stack prototypes under 24-hour challenges.
